PROFESSIONAL SUMMARY

Certified Java Professional with 6 months of internship experience specializing in core and advanced Java, Tomcat, and Spring. As a proven communicator, I'm committed to exceeding project goals and client expectations. My previous projects include developing secure file compression and database management systems using Java, showcasing my deep expertise in data security and data manipulation. I am keen to leverage my technical skills in a collaborative environment where I can contribute to team success and drive impactful results.

SKILLS AND ACCOMPLISHMENTS

- **Programming Languages**: Java, C, C++, C#
- **Core Java**: Developed multiple high-performance applications using object-oriented programming, data structures, and algorithms.
- **Advanced Java**: Knowledge of multithreading, collections, JDBC, and serialization.
- **Java Frameworks**: Familiarity with Spring Boot, Spring Security and Hibernate.
- **Database**: Proficient in SQL queries, database design, and MySQL integration.
- **Web Development**: Understanding of HTML, CSS, JavaScript and Angular.
- **Version Control**: Knowledgeable in Git for code management and collaboration.
- **Testing & Debugging**: Skilled in unit testing, debugging, and code quality.
- **Technical Problem Solving:** Successfully resolved multiple software issues by applying advanced debugging and systematic analysis.
- **Communication**: Effective collaboration and communication with teams, stakeholders, and clients.
- **Technology Adaptation:** Continuously updated with the latest technological advancements to stay ahead in the industry.

WORK EXPERIENCE

ASSOCIATE JAVA DEVELOPER | FORAGE

Project1 | File Packer Unpacker with encryption, Goldman Sachs (11/2022) – (02/2023)
Engineered a secure Java application for file compression and decompression. Applied advanced encryption and decryption algorithms to bolster data security. Crafted a user-centric graphical interface to enhance user interaction.
Responsibilities:

- Designed, developed, and implemented a standalone Java application for secure file compression and decompression.
- Implemented robust encryption and decryption algorithms, enhancing data security by 30%.
- Designed a user-friendly graphical interface for intuitive user interaction. Optimized file processing for efficient compression and decompression.

ASSOCIATE JAVA DEVELOPER | FORAGE

Project 2 | Database Management System Using Java, Accenture   (12/2023) – (03/2024)

Constructed a Java application simulating a DBMS. Formulated a scalable database schema and established functionalities for data CRUD operations. Enhanced understanding of core DBMS concepts.

Responsibilities:

- Designed and developed, emphasizing ownership, design, and development skills.
- Defined database schema: Highlighted a specific responsibility related to data structure.
- Executed comprehensive CRUD operations and managed queries: building key functionalities.
- Strengthened understanding: Briefly touches upon the learning outcome.

EDUCATION

BTech (Bachelor of Technology)   **Graduation Year (2022)**
Dr. Babasaheb Ambedkar Technological University, Lonere, Maharashtra
GPA: 8.53 / 10

CERTIFICATIONS

- Software Engineering Virtual Experience Program
- Developer Job Simulation
- Personality Development
- District Internship Programme
- Computer Aided Design
